Junior Full Stack Developer (Javascript / Node.js)

The future is digital and networked. At racksnet® we develop new, innovative technologies for open, powerful and at the same time simple and secure IT networks. Our solution provides the technical foundations for the digital world of tomorrow. The racksnet® software is cloud based, easy to use and has one user interface for all networks: Campus, IoT, Smart City and data centers.

For our development team, we are looking for you as: **Junior Full Stack Developer (Javascript / Node.js)**

Locations: Frankfurt and Fulda

Your tasks: Multifaceted and future-oriented

- Development of our applications, provisioning of APIs and integration of document-oriented databases
- Execution of automated unit and integration tests
- Innovative further development of the tools and methods used

Your profile: Experienced and practice-oriented

- Completed studies in computer science, software engineering or comparable subjects
- 1 to 3 years practical experience in the development of modern applications
- Node.js. Express vue.js and REST are no buzzwords for you
- Good handling of common web technologies incl. HTML, CSS, JavaScript
- Experience with AWS Database Services and database concepts is desirable
- First Experience with common IDEs (e.g. IntelliJ) and corresponding developer tools (Git, Jenkins)
- Structured software development, curious, quick thinking and reliable
- Enjoy software development and collaborative work

Our company: Experienced and motivated

- We are experienced network, software, finance and marketing specialists
- Our vision is flexible, simple and fail-safe networks - Made in Germany
- As a startup, we offer a lot of freedom and opportunities for personal development

Your application: Straightforward and meaningful

If you want to be part of an innovative start-up, send your application including CV and salary expectations to join@racksnet.com. We are looking forward to it.
