Junior Full Stack Developer Javascript/Node.js

The future is digital and networked. racksnet® develops new, innovative technologies and services for network automation. We create the technical and strategic fundamentals for tomorrow's IT-network and ensure that companies are given the freedom to easily do whatever they want with their network.

For our development team, we are looking for you as our: Junior Full Stack Developer (Javascript / Node.js)
Locations: Frankfurt and Fulda

Your tasks: Multifaceted and future-oriented:

- Further development of our innovative, cloud-enabled applications
- Provision of APIs and connection of SQL databases
- Preparation, execution and documentation of automated unit and integration tests

Your profile: Experienced and practice-oriented

- Completed studies in computer science, software engineering or comparable professional experience
- 1 to 3 years practical experience in the development of modern applications
- Node.js, Express, vue.js Docker and REST are no buzzwords for you.
- Good handling of common web technologies incl. HTML, CSS, JavaScript
- Experience with AWS Database Services and database concepts is advantageous
- First experience with common IDEs (e.g. IntelliJ) and corresponding developer tools (Git, Jenkins)
- Open to new ideas, quick thinking, structured software development and reliable working

Our offer: Excellent opportunity in a highly dynamic market and an experienced team

- Collaboration on an extremely exciting product in a strong future market
- Lots of possibilities for co-designing and personal development

Your application: Straightforward and meaningful

If you want to be part of an innovative start-up, send your application including CV and salary expectations to join@racksnet.com. We are looking forward to it.
